Career Projects : -

Project Title: InfoLives

Application :- <https://dev.infolives.com/login?pid=infocalling&cb=https://dev.infocalling.com/>

Conclusion: The login platform provides a seamless and secure way for users to access multiple services from a single interface. It supports essential features such as login, sign-up, payment gateway integration, and profile editing, ensuring a smooth end-to-end user experience. By offering consistent authentication across different platforms, it enhances usability, reduces user effort, and improves overall system efficiency. This centralized approach not only simplifies navigation for users but also strengthens security and reliability across all connected modules.

Project Title: InfoCalling**Application :-** <https://dev.infocalling.com/> & Mobile App

Conclusion: The application is designed to streamline hospitality and legal service appointments by connecting users with professional doctors and lawyers. Users can conveniently book consultations through **three modes—Online, Home Visit, and Office/Clinic Visit**—with the ability to select their preferred **appointment date** and **available time slot** for a smooth booking experience.

From the **professional side**, the platform provides powerful management features such as **creating and customizing time slots, adding multiple locations, and managing all incoming appointments** efficiently. This ensures better scheduling, improved availability control, and a more organized workflow for professionals.

Overall, the system delivers a seamless, flexible, and reliable end-to-end appointment management experience for both users and professionals.

Project Title: InfoContract**Application :-** <https://dev.infocontracts.com/> & Mobile App

Conclusion: The application is an advanced online platform designed for efficient **document and contract management**. It allows users to create, edit, and manage documents digitally through various integrated modules. Key features include **Create or Send Document, Create Signature, Apply Stamp, Create Template, and Upload Documents**, enabling smooth and secure document handling.

With these modules, users can easily prepare contracts, add legally valid signatures, apply required stamps, reuse templates for repeated documents, and upload existing files for processing. The platform enhances workflow efficiency, improves accuracy, and supports end-to-end digital documentation in a single, user-friendly interface.

Project Title: Walmart International**Application :** <https://www.walmart.com/>

Conclusion: The application is an e-commerce platform where the primary focus is to verify that the **UI elements, product details, and overall user experience** are accurate and consistent. As part of the testing process, key components such as **color themes, design alignment, product images, pricing, and displayed data** are thoroughly checked to ensure they match the actual information shown on the website. This helps maintain visual consistency, prevent misinformation, and deliver a smooth and reliable shopping experience for users.

Project Title: Troopr**Application : Mobile App**

Conclusion: The mobile application is designed for efficient **hotel and event service management**, allowing users to easily book professional staff for various occasions. The platform supports appointment booking for **Chefs, Bartenders, DJs, Bands, and Waiters** based on user requirements. It also enables scheduling for multiple event types such as **House Parties, Kitty Parties, Diwali celebrations, Birthdays**, and other custom events.

The app ensures a smooth booking experience by letting users select the service type, choose the event category, and confirm the required professionals. Overall, the system provides a convenient, organized, and reliable solution for managing hospitality services across different events.
